Lundbeckfonden is calling for applications that will facilitate international collaboration for Danish neuroscience.

Lundbeckfonden’s vision of a better life through new knowledge is supported by our award strategy. We want our grants to make a significant contribution towards increasing the quality and the usability of the cumulative, research-based knowledge and experience gained in the field of biomedical sciences, particularly in the field of brain research.

Each year the Foundation also awards The Brain Prize to brain researchers who have had a ground-breaking impact on brain research.

Who can apply?
You are eligible to apply if:
• you have obtained a PhD degree and want to work as a postdoctoral fellow at a foreign research institution within the field of neuroscience.
• you are an experienced researcher and plan to carry out a research project at a foreign research institution within the field of neuroscience.
• you are an experienced internationally recognized neuroscientist and want to come to Denmark to work with a neuroscience group at a Danish university or university hospital.

Which proposals are eligible?
Your application should concern frontline biomedical research within the field of neuroscience and be carried out at an internationally recognized research institution.

You must include an account of your research plan, collaborators and budget. Furthermore a letter of support from the host institution is required. For PhD students, a main supervisor as a co-applicant is mandatory. Further guidance is provided in the application form.

How much?
Grants are awarded for up to three years and for a maximum of DKK 3 million (approx. EUR 0.4 million).

How to apply?
You must submit the application, written in English, via Lundbeckfonden’s application system at https://lanas.lundbeckfonden.com/. If you have questions or a need for further information, please contact us by email at application@lundbeckfonden.com.

The evaluation
All proposals will be reviewed based on the criteria below:
• Scientific originality and vision of the research idea
• Relevance and rigor of suggested methodology
• Qualifications of the main applicant and co-applicants
• Support and infrastructure available to the project
• Impact for Danish neuroscience

Lundbeckfonden International Neuroscience Programme

Lundbeckfonden is one of Denmark’s largest commercial foundations, worth over DKK 60 billion, and we award research grants of around DKK 500 million each year to Danish-based, biomedical sciences research – primarily in the field of brain research. Founded in 1954 the Foundation has three large subsidiaries, Lundbeck, ALK and Falck, an international portfolio of 20 venture capital companies, organisationally anchored in Lundbeckfonden Ventures, and a portfolio of small biotech companies based on Danish university research in Lundbeckfonden Emerge. Our Investment Department manages assets of around DKK 14 billion.
